## THE PRESIDENCY.

### INCIDENTS OF BATTLE.

**SAVES THE NEW ORLEANS PICTURE.**  
COLONEL HUNT.—This very efficient officer, who is the Deputy Quartermaster stationed here, has addressed a letter to the Courier, in which he vindicates himself from charges urged against the service by a writer in the National Intelligencer. Those particularly noted relate to the accumulation upon the Levee of wagons and fixtures and the cost of transportation. Colonel Hunt explains the explanation respects to us to be perfectly satisfactory on each point. He challenges the investigation of his official conduct—demands that specific charges be made; and declares himself ready to meet them before the legal tribunal recognized in the army. Colonel Hunt's duties have been onerous since the commencement of this war, and he has been subjected to much abuse and reproach, as, with such fidelity and energy, that he should copy his letter, as an act of bare justice, had we room; but the demands of advertisers upon our columns to-day are unusually urgent.

## ANOTHER NAUVOO EXPEDITION

It is said that the more respectable portion of the old citizens of Hancock who have been active in driving off the Mormons, look with disapprobation upon the proceedings of the mob, and that they will oppose no impediment to the progress of the mob, but will be ready to bring to the aid of the majority of those composing it as possible to justice. Should their old prejudices against the citizens of Nauvoo or their predilection for their former companions in insurrection lead them to throw obstacles in the way of the expedition, it is to be feared that the Government will be obliged to call to its aid a militia which will not be slow to come up to the aid of the Government. A lawless mob, flushed with triumph, and revelling upon the scenes of violence, rarely abandon voluntarily their march upon the peaceful and innocent inhabitants of the State, and the immunity from punishment, which they are enjoying, will be a strong inducement to them to a systematic resistance of the highest authority known to the laws. Should they, in their madness, resist the Government and its posse, the people will not fail to do their duty as good citizens, by driving around the Jews of the State, and protecting them from the violence of the mob. Should they arrive when prompt and efficient action is demanded, and such is the popular indignation against the heathens, as bloody ruffians holding their power over Nauvoo, as they will forth all their energies in defence of the part of the people who are guilty of the crime, the Government will be enabled to put it to the test.

It is to be hoped that the issue of the present expedition will be the restoration of law, order, and tranquillity, the repose of the public mind, and the restoration of the character of the State to the respect of the nation and the world. No man will be able to quarrel with the Government, and until these shall be accomplished the people should be willing to sustain any expense and bear any burden. —*Register.*
